INTERESTS / ABOUT ME

2022

I started learning C++. It gave me a good knowledge in basic programming. After that I started learning web development basics such as: HTML, CSS, JS.

Later I started working as a freelancer. Made several web applications, such as: Personal page, "To do" web application etc.

I am currently learning React.js and trying to be competent in all matters, related to web development.

Also I've Completed Financial Market Courses of "Wealthy Traders Club" in 2020.
